Olds' 1941 FALL BULB BOOK

L. L. OLDS SEED COMPANY

MADISON, WISCONSIN

Tulips on Parade at "Gardens on Parade," New York World's Fair.

Plant Now for Gorgeous Spring Flowers

Who is not thrilled at the first signs of the early gay spring flowers that thrust their heads through the cold ground before the last snow has hardly disappeared? Certainly no garden or planting is complete without a plentiful supply of beautiful spring flowers. If you are going to have these gay spring flowers, the planting and work must be done this fall as they cannot be obtained any other season of the year. Fall bulbs are easy to grow. The flower is already in the bulb and all that is necessary is to give the bulb a fair chance to develop. The most important item to remember is that all bulbs must have good drainage to survive. Please note our cultural directions printed on this page. Follow these closely and success will be your reward. To a large extent the beauty of your spring garden will depend much upon the quality and type of material that you plant. We have a reputation of supplying only the best bulbs obtainable and our list comprises the best varieties for outdoor planting.

While we think of fall as bulb-planting time, it is also the time to plant Peonies, Iris, Lilies, Phlox, and other perennials. Our large assortment of plants are all field grown two to three years old. Ideal for permanent beds and borders. Like the bulbs, when once established they will produce an abundance of flowers for years to come.

Do not confuse our prices with those being made on flowering size bulbs. Small No. 2 and 3 bulbs will bloom but it takes the No. 1 greenhouse forcing size to produce the choice, strong-stemmed, large flowers that we all desire. Our prices are genuine bargains considering the quality.

HOW TO ORDER

Send in your order as early as possible on the enclosed order blank. It will be acknowledged at once and bulbs sent as soon as stocks are ready. Later in the season our stocks may become broken and it will probably be impossible to replace them. Orders for plants will be sent about September 10th, weather permitting. No postage is required as prices include postage. Our terms are cash with the order or we will ship C. O. D., providing one-fourth of the amount accompanies the order. Field seeds or fertilizers, however, unless quoted postpaid, are sent express or freight collect.

OLDS' FIFTY-FOUR-YEAR-OLD GUARANTEE

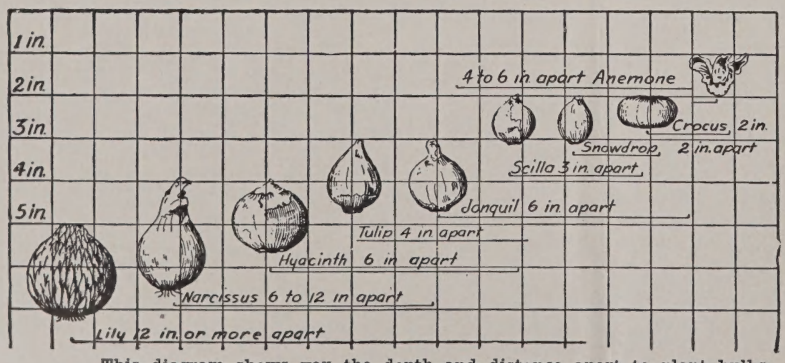
We guarantee all bulbs sent out to be of largest size, true to name and to arrive in satisfactory condition. If upon arrival our bulbs are not equal or superior to any bulbs you could have purchased, or you are not entirely satisfied, they may be returned to us and your money will be promptly refunded. Bulbs and seeds are planted under varying conditions of soil and climate and we will not be responsible for them after they are planted. Nor do we give any further warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out and will not be responsible for the crop.

ORDER BULBS PROMPTLY

Due to war conditions, the available supply of bulbs will not meet the demand. As this catalog goes to press we are assured of a reasonable supply of all bulbs shown in this book, but with a normal demand stocks will not be adequate. We, therefore, emphatically urge you not to delay the placing of your orders. Get your order in now so that it can be filled from the first stocks that will be ready about the 15th of September.

OLDS' EARLY ORDER GIFT

With every order for BULBS amounting to $2.00 or more, received before October 15th, we will include free one dozen early flowering bulbs of our choice. Send your order early and take advantage of our free gift.



This diagram shows you the depth and distance apart to plant bulbs.

HOW TO PLANT

Plant only the finest quality bulbs. Olds' bulbs are the best that can possibly be secured. They have a reputation for large flowers and uniformity of size and color. Most bulbs should be planted in the open ground as early in the fall as possible, as this gives them time to make suitable root growth before freezing weather. They can be planted right up to the time the ground freezes, but with late plantings be sure that a very heavy application of mulch is placed over the beds. All bulbs should be planted to the depth shown in the diagram. Set the bulbs firmly, taking care not to leave an air space at the base of the bulb where water will settle and cause the bulb to rot. CHOOSE A WELL DRAINED LOCATION. This is most important. If you do not have a suitable place raise the bed about six inches for good drainage. Bone meal is a good fertilizer to use as it will not burn. See page 20. Cover the bed after the ground freezes with some form of mulch.

Early Single Tulips

THE FIRST TULIPS TO BLOOM

Olds' Early Tulips grow about seven to fifteen inches tall, are entirely hardy and bloom two weeks earlier than Darwin or Cottage Tulips. They usually blossom in April, continuing for a period of two to three weeks. These dauntless leaders in the season's procession of bloom, gaily put forth their valiant colors while most plants still are dormant.

Though not as tall as the later varieties, early tulips rival them in brilliance of color, and frequently in size of bloom.

Giant Blossoming Hyacinths

The Hyacinth is the most formal of the Dutch Bulbs and the most highly perfumed. Carefully grown in the indoor window garden, Hyacinths reach a perfection of color and bloom that marks them as one of the finest products of the gardener's art. Only large bulbs such as we offer in our named varieties and "Finest Mixed" should be used for forcing, but for outdoor growing in beds or borders the medium sized bulbs of 15 ctm. are satisfactory.

FOR INDOOR PLANTING

Use only the largest size bulbs such as our 18 centimeter size, pot 1 bulb in a five-inch pot, or 3 in a six-inch pot. Place a piece of broken pot or a stone over the hole in the pot; then practically fill the pot with rich, light soil, break off all the shoots from the main bulb and place in the soil so that the top will be about one inch from the top of the pot; then fill the pot with soil up to one inch from the top, water well and set in cool, dark place. After 6 to 10 weeks they can be brought to the light.

FOR OUTDOOR PLANTING

The 14 and 15 centimeter bulbs are the most satisfactory sizes for outdoor planting, but as they are not available this year the forcing or 17 ctm. bulbs will have to be used. Smaller bulbs are often offered but we do not recommend them. Select a well-drained location and spade to a depth of 12 inches, plant the bulbs according to the diagram shown on page 2. Bulbs may be planted up to the middle of November but it is best to plant just as soon as you receive the bulbs.

Hyacinths seem to do particularly well planted a short distance from the foundation of the house on the east and south exposure.

Cover the bed well with mulch as soon as the ground becomes frozen.

FEED THE BIRDS

WOODLAND BIRD DINER

A unique and unusual bird feeder that you will want in your garden. It is made of a white birch log, 1½ to 3 inches in diameter and 12 inches long. The log is drilled with 1⅛-inch holes 1 inch deep which are filled with suet and seed. Has a convenient eyelet for hanging. Wrapped in clear cellophane with a red cellophane bow in the middle. Can be refilled many times over with suet. A pre-package gift item. **Each, 60c, 3 for $1.50, postpaid.**

BULBS FOR FORCING

(17 ctm. Bulbs for Forcing)

Our Hyacinth bulbs are imported and because of the war, it is difficult at this time to know the varieties and the quantity of bulbs that we will receive. We definitely know that we will have a limited supply of four separate colors to offer which are red, pink, white and blue. When the bulbs reach our plant we will know the name of the variety. Orders will be accepted for forcing Hyacinth bulbs by color. We will ship the bulbs when they are ready, properly labeling them as to color and variety. We wish to impress our customers that the supply of Hyacinths will be extremely limited, and to be assured of bulbs for winter forcing, we advise placing your order immediately as we will not be able to accept any orders after the supply in our original shipment is exhausted. Many of our customers were disappointed last year in not being able to obtain bulbs late in the season, and we emphatically urge you not to delay in placing your order for these bulbs. **Prices on bulbs in separate colors** (please state color wanted). **Each, 35c; 6 for $1.80; 12 for $3.50, postpaid.**

PLEASE NOTE—Delivery of bulbs routed via the Pacific now is uncertain and all orders for Lily and Hyacinth bulbs are accepted subject to our receiving our bulbs. Money will be refunded on all orders we cannot fill.

We will send one 17 ctm. bulb each of the 4 colors packed with 4 waterproof flower pots, for only $1.10, postpaid.

WINTER ONION SETS

Perennial or Egyptian. Plant onion sets now for the first early green bunching onions in the spring. These onions form heads on the tops of the stalk which drop to the ground and produce a crop the following season. Start a bed of these in a corner of your garden and have early bunching onions each year with practically no attention at all. Plant them fairly deep or hill to produce long white onions. These onions will not produce bulbs and are only used for bunching onions. **Prices: 1 lb., 25c; 2 lbs., 40c; 5 lbs., 75c, postpaid. Not postpaid, $2.25 bushel.**

Olds' Dainty Daffodils or Narcissus

Many consider the Narcissus or Daffodil the most important of the spring flowering bulbs. Coming into bloom two or three weeks before the earliest tulips, they open the real flower season. They are fresh and dainty, require no special care, are equally satisfactory as indoor or outdoor plants and, left undisturbed in their garden nook, will increase in size and beauty yearly. There are many varieties in each class and we have selected the ones we consider the best. **All our bulbs are American grown, extra large. Six bulbs at half the price of 12 and 50 for half the price of 100.**

COLCHICUM

THE WONDER FLOWER OF THE FLORAL KINGDOM.

Just set the bulb on the table, in the window or shelf. Will bloom without vase, soil, water or care. As soon as the bulb is given light it will begin to grow producing beautiful Crocus-like flowers. Note illustration. As the flowers fade, cut them off and others will follow in succession. Each bulb will produce from six to a dozen flowers. When through blooming, the bulb can be potted and allowed to grow until July when it should be harvested and dried and then placed in the darkness for a few weeks. They can then be used for indoor decorations again. They flower in September so order early. **Prices: Each, 30c; 3 for 75c; 6 for $1.40, postpaid.**

Hardy Lilies

The beautiful fragrant lilies are considered by many too difficult to grow. However, the hardy varieties which we list are no harder to grow than a tulip. They blossom in midsummer when fine flowers are most welcome. Plant with a dark background in groups in the flower border and shrubbery.

CULTURE. Select a place to plant that is well drained. The soil should be spaded thoroughly 15 to 18 inches deep. Do this early in the fall as lilies cannot be moved until late and it is hard to work the ground late in the season, especially after we have had a light frost. Enrich the soil with leaf mold and sheep manure in equal proportions. Set the bulbs 4 to 8 inches deep, depending on the size, tilting to a 45-degree angle. To insure good drainage pack sand around the bulb. Place about four inches of mulch over the bed. See page 17 for Day Lilies (Hemerocallis).

Madonna Lily.

LILIUM CANDIDIUM OR MADONNA. (Ready September.) Plant about the first of October. They grow to a height of two to three feet and bloom about the first of July. Plant with only two inches of soil over the bulb. **Prices, Extra Large Bulbs: Each, 25c; 3 for 65c; 6 for $1.20; 12 for $2.30; 100 for $18.00.**

Olds' Strawberry Plants

JUNE BEARING STRAWBERRIES

The plants will be shipped on or about September 1st, depending on weather conditions. They will not be sent with other goods. They are freshly dug, well packed and sent by themselves. All are Wisconsin grown, large plants, well rooted.

SENATOR DUNLAP. (Perfect Flowering.) Considered by many the best all-around June strawberry. At any rate it is the one most widely known. The plants are medium in size, long rooted and thoroughly drouth resistant. The variety is unusually productive, beginning to ripen early and continuing to bear for a long time.

The fruit is of medium size, smooth, regular and firm and the color is a beautiful red extending well to the center of the berry. **Prices: 50 plants, 75c; 100 plants, $1.25; 200 plants, $2.00; 500 plants, $4.00, postpaid. 1,000 by express, $6.50.**

BEAVER. (Perfect Flowering.) Our new June bearing strawberry. The Beaver is an offspring of the Dr. Burrell and Premier and a much better commercial berry than either one, as the berries are larger, sweeter and firmer. **Will stand unfavorable soil and climatic conditions better than any other variety.** The berries are dark red to the center, of a uniform size and the texture firm, requiring picking not more than twice a week. A deliciously mild and sweet berry. In season it is classed as an extra early, but it will bear on through with the late varieties. **Prices: 50 plants, 75c; 100 plants, $1.25; 200 plants, $2.00; 500 plants, $4.00, postpaid. 1,000 by express, $6.50.**

Field Seeds for Fall Sowing

Our president, Mr. R. H. Lang, inspecting a field of No. 6 Winter Rye.

TREAT YOUR FALL GRAINS WITH CERESAN

Lower your production cost per acre—enlarge your profits—by increasing yields with **New Improved Ceresan,** the ethyl mercury phosphate dust disinfectant. Treat all fall grains with **New Improved** Ceresan to control seed-borne smuts and scab seeding blights. It is effective and inexpensive. Only ½ ounce (there is a measuring spoon in each can) is required per bushel of seed. Costs but 1⅞ to 2½ cents a bushel of seed. Easily and quickly applied by 20 to 25 revolutions of seed treater or 3 turnings with a shovel. Seed should be treated 24 hours before planting. No wetting of the seed nor reduced drilling rate.

Prices: 4-oz. can treats 8 bus. of seed, 30c, postpaid. 1-lb. size, 70c; by mail, 80c; 5-lb. size, $3.00; by mail, $3.25.

WINTER RYE WISCONSIN PEDIGREE NO. 6 WHITE PLANT RYE THIS FALL

Wisconsin Pedigree No. 6 is a strain of Winter Rye recently released by the Wisconsin Experiment Station. Its strong feature is its **very light color, almost pure white.** Prof. Leith says, "**The Pedigreed White Rye** is the result of an effort to get a nicer appearing rye than we had in the old Pedigree Schlanstedt and meets the expectations of millers and bakers who prefer lighter colored ryes."

This new rye is just as good a yielder if not better than the old Wisconsin Pedigree and it has a big advantage **in quality.** It is also shorter in straw.

MICHELS RYE

Michels Rye, developed by Dr. C. A. Michels of the University of Idaho, was first offered as Michels Hybrid Grass. The United States Department of Agriculture, after testing this variety for two years, states that the plant is not a true perennial and because of its plant structure must be classed as a type of Rye. In view of the fact that it has proved successful in some sections of the western states where it seems to be more leafy and heavier than winter rye, and there is a demand for the seed in these sections, we are offering it for sale. Yields of grain as high as 1,200 pounds an acre have been made.

Prices: Lb., 35c; 5 lbs., $1.50, postpaid. By freight: 10 lbs., $2.60; 100 lbs., $24.00.

WINTER WHEAT WISCONSIN PEDIGREE NO. 2

If you are going to sow some Winter Wheat this fall do not sow "just wheat" but sow **Wisconsin Pedigree No. 2.** This is one of the list of famous pedigree grains put out by the Wisconsin Experiment Station. It is from the well-known Turkey Red and has all the good characteristics of that variety—hard red grains, bearded heads, vigorous growth and extreme hardiness.

Wisconsin Pedigree No. 2 is the hardiest of all winter wheats for this section, produces large, plump kernels and outyields all others.

Prices—Certified Stock: By mail: 1 lb., 20c; 5 lbs., 75c, postpaid. By freight: Pk., 60c; bu., $1.75; 10 bus. at $1.70; 25 bus. or over at $1.65.

REED CANARY GRASS

The Grass for Lowlands

Reed Canary Grass is a very valuable new perennial hay and pasture crop especially desirable for low, marshy land. Nothing like it has been thus far produced as it puts land that is just a dead waste into production of valuable forage. Continues to grow without care or attention. Very highly recommended by the Wisconsin and Minnesota Experiment Stations.

For pasture it lengthens the grazing season as it starts very early in the spring, and beginning before June 1st, will furnish an abundance of pasture throughout the entire season until late in the fall.

For Hay. It makes a heavy yield of good quality hay, better than timothy and far superior to wild hay. Ordinarily two or more cuttings can be made in a season. As high as seven tons of hay per acre have been produced in one season.

CULTURE. Seed sown just before the ground freezes up will lie in the ground over winter and be ready to grow early in the spring. The ground in the fall is usually dry so that teams with implements can work the soil. Sow 4 to 6 pounds to the acre with a drill. Seed can also be sown in August and September with good results. There is danger, however, of young seedlings winterkilling, or drowning out in the spring, with unfavorable weather.

Prices, by mail: Lb., 35c; 5 lbs., $1.40, postpaid. By freight: 10 lbs., $2.30; 100 lbs., $21.00.

FANCY RED TOP

RED TOP is a very valuable general-purpose grass. A good meadow grass, one of the best for pasture and splendid for lawns. It not only succeeds on dry land but is also adapted to moist soils.

Red Top will produce a very desirable hay and will thrive and yield well especially on low, flat ground not adapted to clovers and alfalfa. For best results, Red Top should be sown early in September.

Prices, Fancy Solid Seed (recleaned, free from chaff). **By mail: Lb., 30c; 5 lbs., $1.25, postpaid. By freight: 10 lbs., $1.70; 100 lbs., $14.00.**

OLDS' NEW PASTURE MIXTURE

The Division of Forage Crops, U. S. Department of Agriculture, are suggesting a number of **"Pasture Plant Mixtures,"** adapted to different sections. The one that they recommend for our section we are offering our customers as our **"Olds' New Pasture Mixture."** This mixture is made up of Kentucky Blue Grass, Timothy, Red Top, Red Clover and Alsike, the percentages of the seeds used in the mixture running in the order named. Sow 20 pounds per acre for a good stand.

Prices, by mail: Lb., 35c; 5 lbs., $1.40, postpaid. By freight: 10 lbs., $1.90; 100 lbs., $17.00; 500 lbs. at $16.90. Sacks included.

BROME GRASS (BROMUS INERMIS)

A hardy perennial with strong growing root stalks which make a thick firm turf. Does exceedingly well on dry, loose soil. Its unusual drought-resisting powers recommend it for general cultivation. Produces a large yield of highly palatable and nutritious hay. It is slow to start and we advise to sow with a nurse crop when grown for hay. Splendid for permanent pastures. Seed early in spring or late summer at the rate of 20 to 28 lbs. of seed to the acre. **By mail: Lb., 35c; 5 lbs., $1.50, postpaid. By freight: 10 lbs., $2.10; 100 lbs., $18.00.**

SAND VETCH OR WINTER VETCH

A valuable leguminous plant. Sow with rye in September or early October, 15 to 20 pounds of vetch and ½ bushel of rye per acre. Makes fine fall and winter pasture and can also be pastured early in the spring. The seed we offer is the best American grown, cockle free.

Prices, by mail: Lb., 30c; 5 lbs., $1.25. By freight: 10 lbs., $1.60; 100 lbs., $13.00. Sacks included.

VICLAND OATS

Wisconsin's newest variety of seed Oat

This new Oat has received so much advance favorable publicity and has proven so satisfactory in all trial test plantings, that we have received many requests and inquiries for seed. For this reason, knowing that the seed stock is limited, and many of our customers are anxious to get their seed of this new Oat purchased early, we are listing it in our fall catalog.

One of the characteristics of this Oat is the fact that it will stand in the field for a considerable length of time without sprouting, and seed will not be in condition to test and be certified until late December. Orders are all booked for shipment as soon as our stock is ready. Seed this year will be offered in clean new grain bags, sealed and certified by the State Certification Office in three bushel lots.

Vicland is a new variety of Oat developed by the Wisconsin Agricultural Experiment Station from a cross between Victoria, a South American Oat, and Richland, a variety that originated in Russia, and this will be the first year that the seed is offered commercially. Yields were high in 1940 and also in the year 1938 when other Oats were badly damaged by crown rust. Last year some of the fields grown for foundation stocks yielded over 85 bushels per acre. It has a short straw, early, yellow in color, and is high in bushel weight. It is very resistant to the forms of rust commonly found in this region. It is also very resistant to smut. On fertile soil the straw will attain a good height, but on soils low in fertility, it is not recommended as the straw is apt to be too short to cut with a binder. It will, when harvested, stand in the shock for a long period without germinating. A distinct advantage in rainy weather. **Prices: Certified Vicland Oats, by freight in three bushel sealed grain bags at $1.50 per bushel, bag extra at 30c each.** This price is made subject to stocks being unsold upon receipt of the order. Shipment is to be made as soon as stock is sealed and ready for shipment, about January 1st. No seed reserved unless paid for. Orders must be for full bags. Three bags or nine bushels is sufficient for five acres.

Olds' High Grade Timothy Grows Long Heads.

Olds' Lawn Grass Mixtures

Fall is an ideal time to make a new lawn or reseed the old one. Grass seed sown in August and September will sprout and thrive for a long period under favorable conditions before winter sets in. Then, too, weeds are gone in the fall permitting the grass to grow without interference. The winter is not nearly as severe on a lawn as the drought and heat of the summer, and by the time summer arrives the new grass will have had six to seven months of good growing weather so as to be well established for the summer ordeal. Feed your lawn Vigoro, the complete plant food. Apply at the rate of 4 lbs. per 100 square feet. Reseed the bare places. Use seed freely, at least one pound for each two hundred and fifty square feet, for reseeding about one-half this amount.

Olds' Lawn Grass has won a reputation and is widely used by critical landscape gardeners. We offer four very fine mixtures varying in price according to the amount of highest priced seed used. None of them contain timothy and none are cheap mixtures.

MADISON PARKS LAWN GRASS

We recommend Madison Parks Lawn Grass as our best lawn mixture.
